

Tri-Section Puller Set, 4-12 tons

Hydraulic jaw puller set

- Complete hydraulic puller set, including Tri-section Plate, for safe and easy dismounting
- The thin edge of the bearing splitters ensures to remove the most difficult graspable components
- The firm grip behind a bearing's inner and outer rings ensures that the pulling forces are not transmitted through the moving parts, preventing damage to the bearing.
- Most parts are forged SCM440 alloy steel, creating a very safe and durable product.

The complete set includes:

- Integrated pump and cylinder
- Handle 360 degrees adjustable
- Tri-section plate
- Puller block
- Connection rods
- Steel storage case
